

Flexible Durable Extreme

Does Your Thermal Transfer Ribbon Meet Your Application Needs?

What Type of Environment Does Your Ribbon Need to Stand Up In?

- Does it need to be resistant to chemicals?
- Be able to be used in food contact label applications that may or will have direct food contact?
- Tough enough to resist outdoor elements including humidity, UV, moisture, dirt, fading and mechanical destruction?
- Durable enough to withstand autoclave resistance or solvents found in clean rooms?
- Offer UV, scratch and abrasion resistance?
- Be flexible enough to print clean, smudge-free print and images at high speeds on a variety of flexible materials?

With ITW Thermal Films **Flexible, Durable and Extreme PrintheadSaver® Ribbons** -- We've Got You Covered!

Flat head range

ITW Thermal Films understands that each industry and every application has unique requirements for thermal transfer printing, and that the ribbon needs to have certain functionality and durability characteristics for that market sector. PrintheadSaver® thermal transfer ribbons are formulated to meet the distinctive needs of each market we serve.

Need help finding the PrintheadSaver® ribbon that's right for your application, try our online [ITW Extreme Solutions™](#) program, or if you'd like for an ITW TF Sales Rep to contact you, [click here](#).
