

ITW Thermal Films Europe

Launch 'PrintheadSaver® Extreme Series™' stock range

Dear Partner

With the recent work in positioning our range of flat head thermal transfer ribbons we have worked hard to understand just where our products excel. The PrintheadSaver® Extreme Series™ thermal transfer ribbons now delivers four wax resin and resin ribbon products that are suitable for specialist applications where durability and chemicas resistance are required. For further information [click here...](#)

The high performance of our PrintheadSaver® Extreme Series™ ribbon products is backed by extensive test results performed on a number of leading label materials. All PrintheadSaver® ribbon/label compatibility information is available by registering and logging onto [ITW Thermal Films Extreme Solutions™](#) where you can access media compatibility, as well as UL, BS5609 certification and other required functionality requirements you might need for your specific application.

FLEXIBLE	DURABLE	EXTREME	DURABLE	EXTREME	EXTREME+

At ITW Thermal Films, we understand that thermal transfer ribbons for specialist applications also need the flexibility to deliver a commercially affordable solution. We are delighted to launch the [PrintheadSaver® Extreme Series™](#) Stock Range that covers a vast size of label widths in box quantities that make affordable sense.

The [PrintheadSaver® Extreme Series™](#) Stock Range is available for same day dispatch into Europe for orders received before 2pm GMT+1. Minimum order is one box.

For further information speak to your regional sales representative or email us at info@itwextremesolutions.com.

Please note that B128, B120 and B324 are Halogen Free products. Follow the appropriate links for more information on:
