

# Flexible packaging solutions from **TW**

## Get your code on!

ITW Thermal Films and ITW Norwood Marking Systems have teamed up to offer advanced printing and labeling solutions for the flexible packaging industry, including a full range of resin enhanced wax, wax/resin and resin thermal transfer ribbons (TTR) for use in TTO printers, along with high performance coding and marking equipment. ITW offers a wide array of flexible packaging solutions including:

**ITW Thermal Films** - Manufactures, converts, and distributes PrintheadSaver® TTR for a broad range of bar coding and labeling applications, including ribbons that are specially formulated for the flexible packaging industry. ITW Thermal Films offers:

- Ribbons designed to run at higher print speeds, maximizing uptime
- Standard ribbon sizes and configurations for leading thermal transfer overprinters - **IN STOCK AND READY TO SHIP**
- **FDA compliant ribbons for direct food contact** labeling, offering you a safer and greener printing solution
- Flexible, Durable and Extreme ribbon formulations that offer more adhesion to a variety of substrates - meeting all your thermal transfer printing needs

**Norwood Marking Systems** - A leading manufacturer of coding and marking equipment, Norwood has been providing high quality coding and marking equipment for over 50 years. Our current offering includes a wide range of thermal transfer printers for flexible packaging including our economical 53XL80 model. Norwood extends its expertise to customers in the food, beverage, chemical, personal care, pharmaceutical, medical device, electronics, aerospace, military, and other industrial markets. Norwood's model 53XL80 offers:

- State-of-the-art high resolution print head technology ensuring consistent, quality print
- A large 600 meter ribbon capacity, eliminating frequent ribbon changes, minimizing downtime
- An unprecedented 2-year warranty
- Precise ribbon advance control, guarantees the most accurate and economical use of ribbon
